This bulletin provides important information about the 2022 release of Knowledge Based Audits of Common Interest Realty Associations. Please review this bulletin carefully. If you have any questions, additional information is available on CCH [Support Online](#).

### Information about the Title

---

This title is designed to help the auditor efficiently and effectively perform financial statement audits and, when applicable, audits of internal control over financial reporting, of common interest realty associations in accordance with auditing standards generally accepted in the United States of America (U.S. GAAS). Knowledge-Based Audit™ Methodology is a risk-based methodology that emphasizes using knowledge of the entity to make risk assessments in connection with a financial statement audit. This allows the auditor to more appropriately focus audit efforts on those areas which in the auditor's judgment are the most significant and pose the most risk of material misstatement to the financial statements.

Conducting audits of common interest realty associations requires the exercise of the auditor's professional judgment. Additionally, the operations of common interest realty associations are often unique and complex and may require specialized accounting and auditing knowledge. This edition includes specific up-to-date guidance for auditing common interest realty associations.

This document is published for the purpose of communicating the updates and enhancements included in the current version to users of the toolset. This document is not, and should not be used as, an audit program to update the audit documentation of an engagement started in a previous version of this product.

The 2021 title includes CCH® Accounting Research® material links to specific guidance, providing instant access to detailed analysis related to the steps and processes discussed in the workpapers.
