Welcome to 2024 Knowledge-Based Audits™ of Construction Entities for Knowledge Coach

This bulletin provides important information about the 2024 release of Knowledge-Based Audits™ of Construction Entities. Please review this bulletin carefully. If you have any questions, additional information is available on CCH [Support Online](#).

Information about the Title

This title is designed to help the auditor efficiently and effectively perform financial statement audits and, when applicable, internal control audits over financial reporting of nonpublic Construction Entities in accordance with auditing standards generally accepted in the United States of America (U.S. GAAS). The Knowledge-Based™ Audit Methodology is a risk-based methodology that emphasizes using knowledge of the entity to make risk assessments in connection with a financial statement audit. This approach allows the auditor to focus audit efforts on the areas which, in the auditor's judgment, are the most significant and pose the most risk of material misstatement to the financial statements.

Conducting audits of Construction Entities requires the exercise of the auditor's professional judgment. Additionally, the operations of financial institutions are often unique and complex and may require specialized accounting and auditing knowledge. This edition includes specific up-to-date guidance for auditing financial institutions.

This document is published for the purpose of communicating the updates and enhancements included in the current version to users of the toolset. This document is not, and should not be used as, an audit program to update the audit documentation of an engagement started in a previous version of this product.

The 2024 title includes CCH® Accounting Research Manager® material links to specific guidance, providing instant access to detailed analysis related to the steps and processes discussed in the workpapers.
