Welcome to 2025 Knowledge-Based Audits™ of International Entities for Knowledge Coach

This bulletin provides important information about the 2025 release of Knowledge-Based Audits™ of International Entities. Please review this bulletin carefully. If you have any questions, additional information is available on CCH [Support Online](#).

Information about the Title

This title is designed to help the auditor efficiently and effectively perform financial statement audits of international commercial entities in accordance with International Standards on Auditing (ISAs) promulgated by the International Auditing and Assurance Standards Board (IAASB). Knowledge-Based™ Audit Methodology is a risk-based methodology that emphasizes using knowledge of the entity to make risk assessments in connection with a financial statement audit. This allows the auditor to more appropriately focus audit efforts on those areas which in the auditor's judgment are the most significant and pose the most risk of material misstatement to the financial statements.

Conducting audits of international entities requires the exercise of the auditor's professional judgment. Additionally, the operations of international entities are often unique and complex and may require specialized accounting and auditing knowledge. This edition includes specific, up-to-date guidance for auditing international commercial entities.

This document is published for the purpose of communicating the updates and enhancements included in the current version to users of the toolset. This document is not, and should not be used as, an audit program to update the audit documentation of an engagement started in a previous version of this product.

The 2025 title includes CCH® Accounting Research® material links to specific guidance, providing instant access to detailed analysis related to the steps and processes discussed in the workpapers.

Caution! This toolset does not include all audit requirements included in U.S. Generally Accepted Auditing Standards (U.S. GAAS). Engagements that are required to be performed under both ISAs and U.S. GAAS should also refer to the Knowledge-Based Audits of Commercial Entities for requirements under U. S. GAAS. An AICPA member conducting an audit in accordance with the ISAs must also comply with U.S. GAAS.
