New in this Release

Knowledge-Based Preparations, Compilations and Reviews of Commercial Entities

This title can be installed on CCH[®] ProSystem fx[®] Engagement v2018 by first installing the CCH ProSystem fx Engagement v2018.2.4 Update for Knowledge Coach. The latest update can be downloaded [here](#). This update allows you to use the 2019 content without installing ProSystem fx Engagement v2019 until your firm plans to update.

This title is designed to help the accountant efficiently and effectively perform financial statement preparation engagements, compilations, and reviews of nonpublic commercial entities in accordance with Statements on Standards for Accounting and Review Services (SSARS) issued by the Accounting and Review Services Committee (ARSC) of the American Institute of Certified Public Accountants (AICPA).

The Knowledge-Based Preparations, Compilations and Reviews of Commercial Entities methodology emphasizes using knowledge of the entity to perform preparation, compilation, and review engagements by facilitating the flow of information so that the understanding obtained in each process affects the decisions made in the next. Although the accountant will likely perform most steps in this methodology sequentially, conducting an engagement is not necessarily a linear process. Knowledge gained from preliminary engagement activities helps the accountant design and customize engagement procedures; evidence gained from procedures performed is evaluated, and the appropriate accountant's report, if any, is issued. This edition includes specific up-to-date guidance for conducting preparation, compilation, and review engagements in accordance with the SSARS.

This document is published for the purpose of communicating the updates and enhancements included in the current version to users of the toolset. This document is not, and should not be used as, a program to update the documentation of an engagement started in a previous version of this product.

If you are updating from a previous version of this title, refer to the *Knowledge Coach User Guide*, Chapter 12. The guide is found on the Engagement File Room Help menu.

The 2019 documents include CCH[®] Accounting Research[®] material links to specific guidance that provide instant access to detailed analysis related to the steps and processes discussed in the workpapers.

 - Enhancing engagement documentation

CCH® ProSystem fx® Knowledge Coach

Knowledge Coach functionality allows accountants to use the Knowledge-Based methodology more efficiently by eliminating the need for duplicate entry of the same information, tailoring documentation to each particular engagement, and documenting the link between risks identified and procedures performed. PRP-100 Engagement-Level Tailoring Questions, CMP-100 Engagement-Level Tailoring Questions, or

REV-100 Engagement-Level Tailoring Questions are documents in Knowledge Coach that present engagement-level questions designed to aid in tailoring the engagement documentation to fit each client. Completing the questions helps the accountant avoid duplication and unnecessary workpapers.

Note: Before you begin your engagement, please review the guidance in PRP-101 Overall Preparation Program, CMP-101 Overall Compilation Program, or REV-101 Overall Review Program. This workpaper is intended to be your road map through a Knowledge-Based methodology. Start your engagement with PRP-100 Tailoring Question Workpaper, CMP-100 Tailoring Question Workpaper, or REV-100 Tailoring Question Workpaper, as well as PRP-101 Overall Preparation Program, CMP-101 Overall Compilation Program, or REV-101 Overall Review.

- **Risks** can be captured via the Risk Summary task pane from any Knowledge Coach workpaper by the current editor of KBA-502 Summary of Risk Assessments. This allows you to continuously assess risks during the engagement. Several workpapers prompt you to consider the presence of risks, but the Risk Summary task pane must be used to document those risks. All documented risks flow to the Risk Summary. To ensure risks show in findings tables, select the *workpaper identified in* field of the Risk pane.
- **Information Flow** helps reduce the time spent duplicating information across forms. In addition, the flow of consistent information ensures that information and updates to information are not missed between workpapers. Drill-down functionality helps the user navigate quickly to the source of the information, aiding in the review of the audit file.
- **Diagnostics** help track unresolved issues like unanswered questions, incomplete risks, program steps not linked to risks or relevant assertions, missing workpaper, and more.
- **Links to Accounting Research Manager (ARM)**, if you subscribe to an ARM library that includes audit content, link directly to source material from Resources within Knowledge Coach workpapers. These links have been updated to reference the accounting standards under the FASB Accounting Standards Codifications and the auditing standards issued by the AICPA. Also, if you subscribe to the Knowledge-Based Audits of Commercial Entities Guide on ARM, you can take advantage of links to the audit guide material from within the Knowledge Coach documents.
- **Interpretive Guidance** is integrated in each Knowledge Coach template through the Tips view of each new task pane. Informational features include Practice Points, Examples, Optional Workpapers, and Resources to help auditors work more effectively and efficiently. You can also navigate from Resources within a document or the tip pane directly to CCH’s Accounting Research Manager and industry audit guides by simply clicking on the reference.
